FOREWORD

The Lead India Foundation is pleased to participate in the Give Globally Foundation, USA, Initiative on Ranking of Indian Institutions (Higher and Higher Secondary Schools) with a larger objective to improve ranking of Indian School in USA School Rankings. The Expert Committee, appointed for developing a ranking system for secondary and higher secondary schools had benefit of access to the Country Level School Ranking Framework developed by the Core Committee appointed by the Give Globally foundation, USA. The Core Committee has done a commendable job of identifying parameters that have global appeal as well as those that are country-specific reflecting problems and prospects woven into our cultural and social fabrics.

The Committee while giving emphasis on parameters that have global appeal e.g. research output, research impact, learning environment, etc. has also considered parameters like infrastructure, facilities for differently abled persons, percentage of students from other states and other countries; percentage of women students and faculty, and percentage of economically and disadvantaged students. The Expert Committee had also given weightage to the sports and extra curricular facilities available in the campuses of universities and colleges, which, I believe emphasizes on overall development of a student in a School. I would like to put on record the commendable job done by the Expert Committee, under the Chairmanship of Prof. Tito, Member, Give Globally Foundation. I would also like to acknowledge contribution of USA Based Accreditation organization IAO, with its informative session in USA in terms of inputs on bibliometric and citation parameters.

The Centre has already developed a portal for ranking universities in India based on these parameters using widely accepted ranking formula. I believe that the ranking framework developed for ranking Schools will have wider appeal across USA and Indian Schools. Thousands of institutions would volunteer themselves to the ranking exercise with an aim to assess themselves on the qualitative parameters used for ranking of institutions and move upward on the quality spectrum to improve their ranking in subsequent years. Finally, we to manage the cost of the expenses for this work, we invite all the participating institution to Donate and help us to get the donation in the great initiative of this nonprofit organization Give Globally Foundation.

Why CSR – 2020- Act Locally – Think Globally

Third Party recommendations has become the need of the day and if that is also from a notional Level Non Profit, which maintains an high level of Neutrality, accountability and trust worthiness, then the acceptance of the people becomes high. Within the last decade, third-party recognition has emerged as a critical element impacting an institution's perceived success including its professional reputation, organisational advancement and perhaps more important, business development opportunities. While third-party recognition comes in many forms, the collective result of such accolades is confirmation of an institution's trustworthy talent as well as an overall enhanced professional standing within its area of expertise.

What is CSR - 2020 - Know The Position Of Your School

CSR-2020 is an initiative of Lead India Foundation which intends to bring a positive impact in the city about the schools of that area. It is seen that, people in most of the cities want to know about the school or institute where they want to send their child. But, at the country level there are very less accredited institution, if they are accredited not properly published in the public. Most of the Schools want to get their rank in the country level, but due to some other constraints they could not and CSR-2020 will fulfil this need of the Schools.
